

Maintenance & Cleaning Specification

Marble Floors

General Guidelines:

Marble flooring is made from natural stone and is sensitive to harsh chemicals. For optimal results we recommend the diamond pad method that uses microscopic diamonds to polish the floor's natural surface.

The sealing of marble floors is not recommended.

NOTE: Eco Brilliance Pads contain billions of microscopic diamonds which work progressively with one another to restore and polish marble flooring.

1. **Red** – Coarse
2. **Blue** – Medium Duty
3. **Yellow** – Fine
4. **Green** – Very Fine

For very damaged floors, start with the **Red Eco Brilliance Pad** and work your way up to a **Green Eco Brilliance Pad**. If there is some damage, start with **Blue**, if very light damage start with **Yellow**. For maintenance, **Green** can be used. Always start with a softer pad before moving to a more heavy duty pad. Contact an Industroclean consultant if you are uncertain.

Restoration

Step 1

- All dust, sand and stones must be removed prior to scrubbing. This can be done with either a vacuum cleaner or by sweeping with disposable cloths such as **Masslinn®**.

Step 2

- Apply water to the designated area.
- Scrub using a **Low Speed Scrubber** fitted with a **Red Eco Brilliance Pad**, passing over the same area 3-7 times.
- Vacuum the dirty solution from the floor with a **Wet & Dry Vacuum Cleaner**. Repeat the above process:
 1. Using a **Blue Eco Brilliance Pad**, passing over the same area 7-10 times
 2. Using a **Yellow Eco Brilliance Pad**, passing over the same area 10-15 times
 3. Using a **Green Eco Brilliance Pad**, passing over the same area 10-15 times

Notice to purchaser: Industroclean (Pty) Ltd's only obligation shall be to replace such quantity of the product(s) supplied proved to be defective. The methods and products described above are recommendations only. Therefore, the user assumes all risk and liability with the methods and use of products described in this document.

Step 3

- Buff the floor using a **High Speed Buffing Machine** and a **Green Eco Brilliance Pad**. For optimal results, a **Burnisher** is recommended.

Daily Maintenance

1. Dust sweep with a disposable cloth system such as **Masslinn® Tool** and **Masslinn® Cloths**
2. Spot mop wet sticky dirt with a **Vileda Microfibre Flat Mopping System** and **Progen** quick drying detergent. For optimal results, make sure that the rinsing water is changed regularly. .
3. For larger areas, wash the floor using a **Nilfisk Automatic Scrubber-Drier, Green Eco Brilliance Pad** and water. For heavy soiling, use with a low foam neutral detergent such as **Proslip** diluted according to the manufacturer's instructions
4. Buff the floor using a **High Speed Buffing Machine** and a **Green Eco Brilliance Pad**. For optimal results, a **Burnisher** is recommended.

Cleaning of Equipment:

1. All equipment should be cleaned thoroughly after use.
2. Pads should be rinsed or vacuumed depending on soiling.
3. Single disc machines must be wiped with a damp cloth and disinfectant if needed.

Notice to purchaser: Industroclean (Pty) Ltd's only obligation shall be to replace such quantity of the product(s) supplied proved to be defective. The methods and products described above are recommendations only. Therefore, the user assumes all risk and liability with the methods and use of products described in this document.
